

Parking at the Karlsruhe Convention Centre

Our convention centre offers space for 1,000 cars in the public underground car park at the Festplatz.

The maximum entrance height in our underground car park is 1.90 m. For selected events, the Festplatz offers additional space for around 80 cars or 20 buses/trucks.

The underground car park has green-marked e-parking spaces on parking deck C. Here you can charge your electric vehicle (with type 2 plug up to 22 kW) for a fee.

Please note:

We recommend that you validate your parking ticket before the evening events at one of the cash machines or with our staff. This allows you to avoid waiting times after the event.

The event flat fee of € 6.00 is generally valid from 1 hour before admission until 1:30 a.m. the following day.

We offer special rates for conference participants and exhibitors.

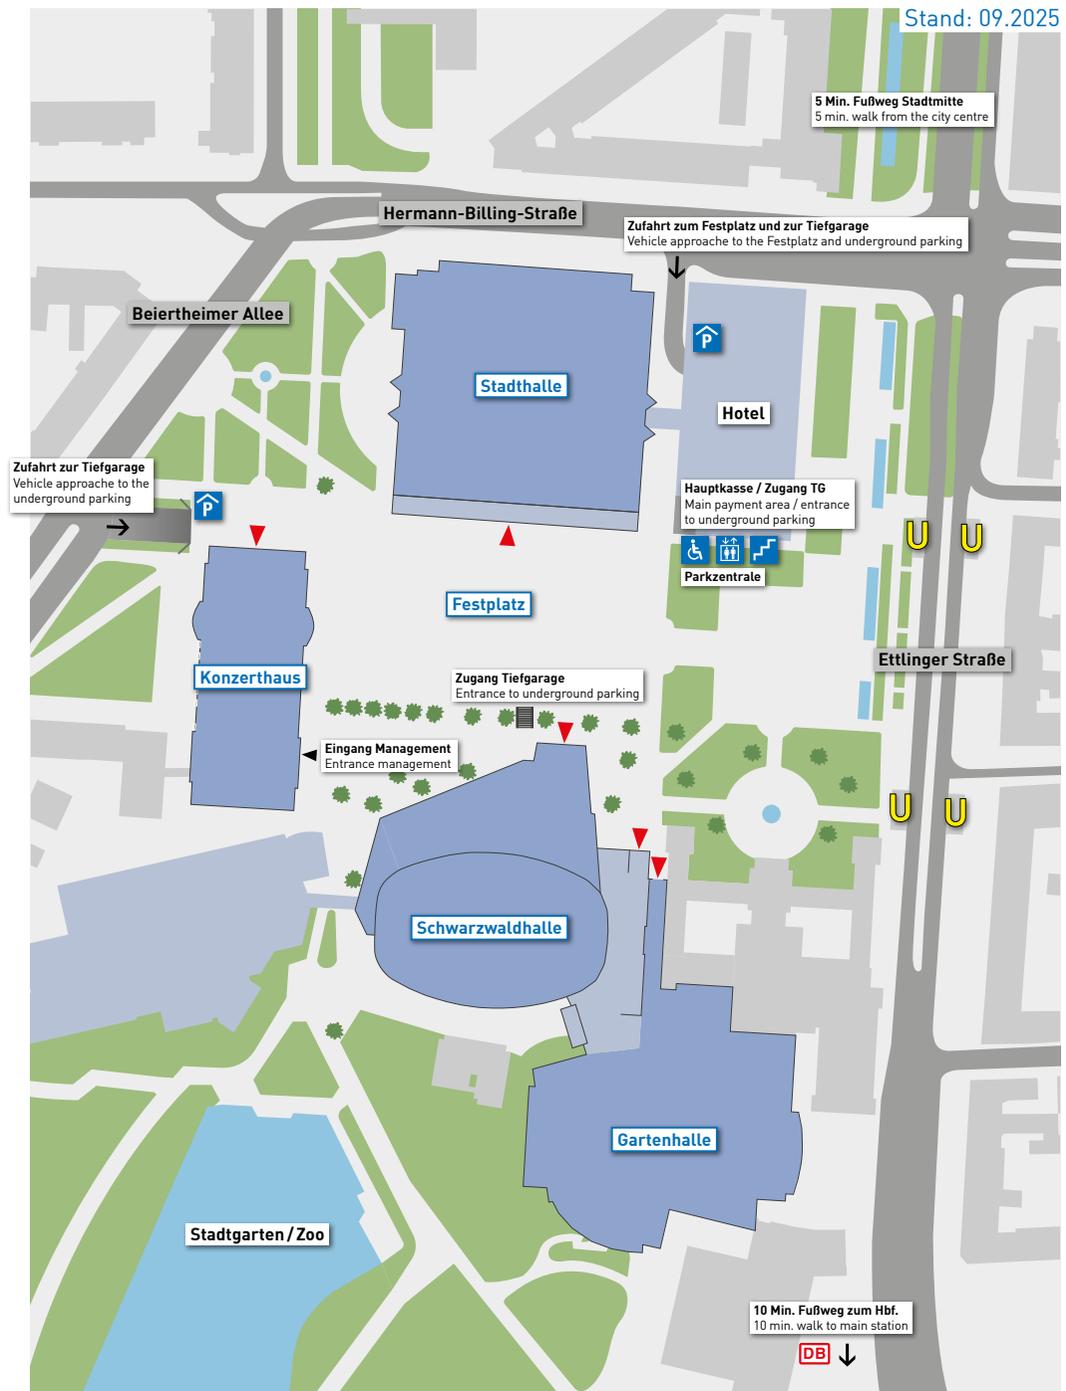

Please contact the underground car park control centre (Parkzentrale) with your proof of eligibility. Unfortunately, overnight stays in motorhomes are not permitted on the fairground.

During **major events** or **events taking place simultaneously**, there may be bottlenecks in the availability of our parking spaces. Please note that the traffic management system does not display the occupancy of the underground car park in real time.

We therefore recommend arriving early. If the underground car park is full, we recommend using nearby multi-storey car parks.

For a stress-free journey, we also recommend using public transport – the stops are located directly at our buildings and are less than a 3-minute walk away.

Cycling is also a practical and environmentally friendly option.
